SPONSORSHIP PROPOSAL

WHO WE ARE

Noctem Development is a student-driven non-profit organization dedicated to promoting problem solving in computer science by creating equitable access to programming resources and competitions. Our prior competitions, Noctem Virtual I & II, attracted over 250 competitors and over 100 teams each. This year, we intend to continue to expand even more with our third virtual competition, Noctem Virtual III!

WHY SPONSOR?

Hundreds of students will be participating at Noctem Virtual II, so this event is a great place for you to reach our community of computer science enthusiasts. We hope that your sponsorship can lead to a successful competition for our participants, learning opportunities for students, and benefits for your company as well.

01 Giving Back to the Community

At Noctem, our mission has always been to help both new and old competitive programmers to learn and practice their craft. As a sponsor, you will not only be helping us as an organization, but also everyone else who wants to explore computer science and programming. Your support will allow students to connect to your company and prepare for their futures.

02 Custom Challenge

Reaching out to and inspiring the next generation of programmers is a large part of who we are, and we would love to provide competitors a chance to get new experiences on top of the problems that we give them. By sponsoring Noctem Virtual, you will be able to create a custom challenge to pose to competitors focusing on any topic or framework that you would like, giving students a chance to experience problem solving in true to life situations.

WAYS YOU CAN HELP

● Sponsor Money

As with all events, many of our expenses are monetary expenses, rather than merchandise or prizes. Therefore, we greatly appreciate monetary donations to help us run the competition, as well as any other forms of sponsorship!

● Prizes

As part of our tradition, we provide prizes to the highest scoring teams or individuals throughout our competition. If you would like to sponsor a prize, they will be given out to the top teams, or, upon request, arrangements can be made for a custom prize.

● Speakers & Mentors

As a non-profit striving to help others learn, we understand the value of the opinion of experts. In past years, we have had keynote speakers come and talk about their experiences in computer science careers to educate and inspire our participants. With an online audience, we can reach a much larger audience than before. If you would like to present technical advice, experience, or future careers in computer science, then our team would love to accommodate you!

Perks	Tier I \$20-250 USD	Tier II \$250+ USD
